1

Don't Forget About Traditional Questions :-

Keep Prepare this Types of Questions :-

→ **"Why do you choose this company?"**

→ **"Do you think you are deserving for this position?"**

→ **"What qualities makes you stand out from others?"**

→ **"what are your hobbies?"**

" These questions are usually asked by the interviewer so as to create a basic outline about the candidate and what all are his interests."

2

Practice Decision making and Solving Problems :-

When you are attending for a coding interview

The interviewer asks the candidate to create a code based on a certain scenario.

- **Try to consider the various options**

- **Don't move forward If you don't understand the Question Properly**

" The main purpose of such a test is to check whether the candidate can create a program with as very little bugs as possible and it should be really efficient."

3

Basic knowledge review :-

Whenever you get the time try to brush up your previous knowledge :-

→ **If You are Proficient in C++ then,**

  Revise About Scanf , Printf { From C }

→ **Revise Data Structure and Algorithms.**

→ **Try to Provide Reasonable variables Names.**

Sleep Well

" By brushing up, it does not necessarily mean to read the whole thing starting from the beginning."

4

Practice mock interviews :-

Mock practice is one of the important interview tips :-

→ **This Will help you a lot to deal with Real time Questions**

→ **Try Leetcode** LeetCode

Or
→ **Try Interview Bit** InterviewBit

"Try to mentally prepare yourself as much as you can for the interview."

5

Know more about the company :-

This is one of the most basic questions that every candidate should be aware of while preparing for an interview

→ **It necessary to research about the company is that many companies follow the culture fit test.**

→ **You have to persuade them into thinking why you're fit for the company and why you deserve the job.**

→ **Don't Create your fake identity.** 🙏
